- ❖ [LinkedIn](#) || [Portfolio Website](#)

Software Engineer with 2+ years of experience in full-stack web development. Expertise in Next.js, Node.js, and Strapi CMS, React, Vite, Apollo Client, GraphQL, Hasura, PostgreSQL, and MongoDB. Skilled in leading development teams, optimizing web performance, and building scalable, maintainable solutions. Passionate about code optimization, system architecture, and client project management.

Work Experience

MSYS Technologies - Software Engineer

Aug 2022 – Dec 2024

- Developed scalable full-stack applications with Next.js and Node.js, improving website performance by 30%.
- Integrated Strapi CMS, reducing content management time by 40%.
- Optimized UI/UX, reducing bounce rates by 25% and enhancing engagement.
- Led data migrations from MongoDB to PostgreSQL, ensuring 100% data integrity.
- Implemented secure authentication protocols, aligning with industry security standards.

WEZO Technologies - Software Engineer

Feb 2025 – present

- Led and managed a development team, providing technical guidance and best practices in frontend and backend development.
- Architected optimized web performance solutions, enhancing application efficiency and reducing load times.
- Designed and maintained scalable client projects, ensuring seamless integration with Next.js, Vite, Apollo Client, GraphQL, Hasura, PostgreSQL, and MongoDB.
- Spearheaded code optimization strategies, improving application maintainability and reducing technical debt.
- Collaborated closely with stakeholders and clients, gathering requirements and delivering high-quality, business-driven solutions.

Project Experience

HUMD (AI-Powered Printing & SaaS Marketplace)

Feb 2025 – present

- Developed and maintained a scalable e-commerce platform using Next.js, Vite, React, Apollo Client, GraphQL, and Hasura.
- Optimized database queries and GraphQL performance, reducing data fetching times by 40%.
- Implemented custom caching strategies, improving API response time and user experience.
- Ensured **secure payment gateway integration** and streamlined order management workflows.

WatNxt (Job & Internship Matching Platform)

Feb 2025 – Present

- Led the development of a Next.js-based career platform for students and employers, integrating Vite, React, PostgreSQL, Node.js, and MongoDB.
- Implemented efficient backend workflows using Node.js and PostgreSQL, reducing query execution times by 30%.
- Built a real-time application tracking system with a scalable architecture to support high concurrent users.
- Developed a dynamic dashboard with role-based access control, ensuring data security and smooth user navigation.

Heartfulness — (LMS Project - Software Development & Service)

Jan 2024 – Dec 2024

- Enhanced website performance by 50%, reducing user drop-off rates by 25%.
- Built secure authentication systems, ensuring GDPR-compliant user data protection.
- Automated email workflow integration, boosting system efficiency.
- Improved UI/UX, reducing support inquiries by 20% over 6 months.

GSM — (Government Project - Ministry of Culture Partnership)

Feb 2024 - Apr 2024

- Developed Next.js-based frontend supporting 5,000+ attendees at a national event.
- Improved user engagement metrics by 35%, based on usability testing from 200+ users.
- Aligned UI designs to ensure a seamless user experience.

Amazon — (Software Development & Service)

Jun 2023 - Jan 2024

- Engineered REST APIs in Node.js, reducing response times by 40%.
- Migrated 100% of data from MongoDB to PostgreSQL, ensuring seamless system performance.
- Managed project deadlines and ensured 100% compliance with best coding practices.

Education

Dream Institute of Technologies, Kolkata — B. Tech

Aug 2018 - Jul 2022

- Electronic And Communication Engineering with **8.82 CGPA**.

Technical Skills

- **Front End** - React.js, Next.js, TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Back End** - Node.js, Express.js, RESTful APIs, Strapi CMS
- **Programming** - JavaScript (ES6+),
- **Databases** - MongoDB, PostgreSQL, MySQL
- **Tools** - Git, GitHub, npm, Postman
- **Deployment** - AWS (Basics), Vercel, Render

Certifications

- Full JavaScript & ES6 Certification – Udemy.
- Node.js Development Course – Udemy.
- Backend Development Course – PW Skills.
- Startup India Learning Program – Upgrade.
- Full Stack Development Course – PW Skill.
