## Objective

---

Software Engineer with 4+ years of experience across full-stack web development and product ownership, specializing in Next.js, React, Node.js, TypeScript, Express.js, PostgreSQL, and MongoDB, with working knowledge of AWS and Azure. Currently a Senior Software Engineer at Tech Exactly, owning products end-to-end from architecture through deployment including a HIPAA-compliant healthcare claims platform and a multi-tenant SaaS API platform for psychometric assessments. Experienced in leading development teams, architecting scalable systems, and collaborating directly with stakeholders to ship reliable, secure, production-grade software.

## Work Experience

---

### Tech Exactly — Senior Software Engineer

March 2026 – Present

- Joined as a Senior Software Engineer, taking full ownership of product delivery across frontend, backend, and deployment.
- Built EOB-MAX, a HIPAA-compliant healthcare claims management platform for attorneys and medical practices, from the ground up owning both frontend and backend.
- Sole engineer on Psychometric Insights, responsible for backend, frontend, and deployment end-to-end.

### WATNXT Technologies Ltd. (WEZO Technologies) — Full Stack Developer

Feb 2025 – Feb 2026

- Led a team and guided best practices across frontend and backend development.
- Architected optimized web performance solutions, enhancing application efficiency and reducing load times.
- Collaborated closely with stakeholders and clients, gathering requirements and delivering high-quality, business-driven solutions.
- Mentored junior developers and conducted code reviews to maintain code quality.

### MSYS Technologies - Software Engineer

Aug 2022 – Dec 2024

- Developed scalable full-stack applications with Next.js and Node.js, improving website performance by 30%.
- Integrated Strapi CMS, reducing content management time by 40%.
- Optimized UI/UX, reducing bounce rates by 25% and enhancing engagement.
- Led data migrations from MongoDB to PostgreSQL, ensuring 100% data integrity.
- Implemented secure authentication protocols, aligning with industry security standards.

## Project Experience

---

### Psychometric Insights — SaaS api service provider platform

June 2026 – present

- Built a SaaS platform that provides psychometric assessment APIs for client organizations (schools, colleges, and companies) to integrate directly into their own platforms.
- Developed an admin and client panel to create and manage psychometric question sets in multiple languages and locales (US, UK, Haiti, Portuguese, Hindi, Spanish, and more).
- Designed the assessment flow so client end-users take the test on the client's platform and receive a generated score band via API response, with no client end-user data stored on the platform.
- Working as the sole developer on the project, owning backend, frontend, and deployment.

### EOB-MAX — HIPAA-Compliant Healthcare Claims Management Platform

March 2026 – May 2026

- Built a secure healthcare claims platform for managing EOB, AOB, and CMS-1500 forms, medical records, patient details, billing data, and claim documents.
- Implemented backend APIs for users, practices, claims, documents, notifications, invitations, reference types, audit logs, and authentication.
- Added secure document handling with file metadata, document type tracking, upload status, file hashing, and pre-signed document viewing.
- Followed HIPAA-focused practices including minimum necessary access, PHI/PII isolation, immutable audit logs, secure cookies, and internal-only service communication.

### Watnxt — (Job & Internship Matching Platform)

March 2025 – Feb 2026

- Led the development of a Next.js-based career platform for students and employers, integrating Vite, React, PostgreSQL, Node.js, and MongoDB.
- Implemented efficient backend workflows using Node.js and PostgreSQL, reducing query execution times by 30%.
- Built a real-time application tracking system with a scalable architecture to support high concurrent users.

- Developed a dynamic dashboard with role-based access control, ensuring data security and smooth user navigation.

## Remzo Platform — (Multi-Tenant SaaS HR & Attendance System)

May 2025 – Sept 2025

- Architected a scalable multi-tenant SaaS platform using Next.js, TypeScript, Node.js, Express, and MongoDB with role-based access for Admin, Employer, and Employee portals.
- Implemented automated attendance management with timezone handling, cron-based auto check-outs, and multi-session tracking, reducing manual errors by 60%.
- Optimized backend performance with React Query caching and MongoDB indexing, improving data fetch efficiency by 40%.
- Integrated Stripe payments with coupon management, subscription workflows, and automated invoice generation.

## HUMD — (AI-Powered Printing & SaaS Marketplace)

Feb 2025 – Mar 2025

- Developed and maintained a scalable e-commerce platform using Next.js, Vite, React, Apollo Client, GraphQL, and Hasura.
- Optimized database queries and GraphQL performance, reducing data fetching times by 40%.
- Implemented custom caching strategies, improving API response time and user experience.
- Ensured secure payment gateway integration and streamlined order management workflows.

## Heartfulness — (LMS Project - Software Development & Service)

Jan 2024 – Dec 2024

- Enhanced website performance by 50%, reducing user drop-off rates by 25%.
- Built secure authentication systems, ensuring GDPR-compliant user data protection.
- Automated email workflow integration, boosting system efficiency.
- Improved UI/UX, reducing support inquiries by 20% over 6 months.

## Amazon — (Software Development & Service)

Jun 2023 - Jan 2024

- Engineered REST APIs in Node.js, reducing response times by 40%.
- Migrated 100% of data from MongoDB to PostgreSQL, ensuring seamless system performance.
- Managed project deadlines and ensured 100% compliance with best coding practices.

## Education

### Dream Institute of Technologies, Kolkata — B. Tech

Aug 2018 - Jul 2022

- Electronic And Communication Engineering with **8.82 CGPA**.

## Technical Skills

- **Front End** - React.js, Next.js, TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Back End** - Node.js, Express.js, RESTful APIs, Strapi CMS
- **Programming** - TypeScript, JavaScript (ES6+), Python (Basics)
- **Databases** - MongoDB, PostgreSQL, MySQL
- **Tools** - Git, GitHub, Npm, Postman
- **Deployment** - AWS, Azure, Vercel, Render, Railway, CI/CD, Docker

## Certifications

- Node.js Development Course – Udemy.
- Full Stack Development Course – PW Skill.
- DevOps Course – Tutedude.
- Startup India Learning Program – Upgrade.

## Open Source

- [meetschedify](#) — Published an npm package providing a reusable meeting-scheduling utility for JavaScript/Node.js projects.
